## INTRODUCTION

Philatelic design markers have been in use as “tools of the trade” by American perfin collectors for over fifty years. Initially, the perfin design markers for the Territory of Czechoslovakia, made to accommodate the illustrations in Vojtech Maxa’s first perfin catalog in 1972, were without any other pertinent information. This edition of perfin design markers will add only the numerical descriptor to the basic design as illustrated on the cover of this document.

To accommodate special circumstances, we have added three descriptors to our lexicon of terminology:

- 1) discarded; indicates those designs that previously had been identified as belonging to a Czechoslovak company on foreign soil (i.e. D16 – now known to be an Austrian company).
- 2) incomplete: Identifies the designs that were previously thought to be “stand alone” designs, but now were verified as only part of a larger design due to the punch device being damaged over time (J103), the design not properly centered when struck (i.e. G33), or not able to fit on a single stamp (i.e. N5).
- 3) not verified; indicates those designs that were included in previous catalogs, but have been removed for lack of proof of connection between the design and the company’s location through the city postmark or an entire with the company address (i.e. B11).

Collectors who use these markers are advised NOT to try to validate designs/patterns that look similar to the “unaided eye” as the illustrations have been scaled to fit the space available on the marker.

Because many Czech and Slovak cities have been, at some point in time, under foreign rule, their company perfin designs can be found on stamps of Austria, Hungary, Poland, Germany and others. The most current catalog\*, from which this set of markers has been generated, goes into detail and notes the subtle differences between such designs. True design/pattern verification can be accomplished by using the designs found in this 2022 Catalog. The majority of them also can be found in earlier Czechoslovak catalogs

## Czechoslovak Marker Appendix

This appendix has been created to assist collectors who organize their perfin by stamp series/groupings instead of all stamps of a single perfin design.

The authors of this document realize that duplicating a page of perfin designs in order to obtain one particular design results in marker sheets of little value due to the duplication of unneeded designs.

To that end we have included in this appendix a sheet of blank marker squares. Each collector can assess which designs are most often repeated, ahead of organizing the collection, and place them on the sheet of blanks for duplication.

The blank marker sheet (void of design image) can also be used to hand print just the perfin design number in the squares for a second, third, fourth, etc. stamp series if the design image is deemed unnecessary.

We hope this explanation has been, and the templates will be, helpful in pursuing the organization of your perfin designs.
